Just in time for the approaching winter (OK, in the Southern Hemisphere), the Snow theme for Tiki CMS is available for downloading. This is a full-width, three-column design with snowflake-pattern page backgrounds, module boxes, etc. A Flash .fla file is included for making a logo with a snowfall effect.

Please visit [this page](#) for more information. The archive can be downloaded at the [Tiki CMS](#) in to download files — register first at [Tiki CMS](#) if necessary. See [this page](#) discussion about this theme.
